

Sales Performance

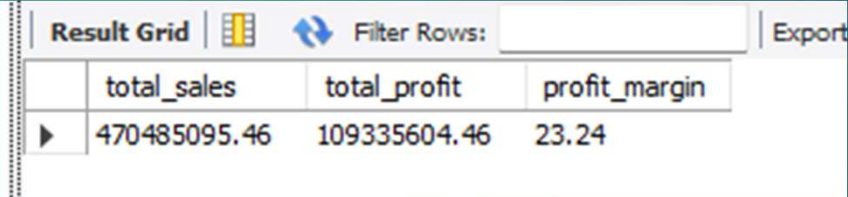

SQL+POWER BI

Business Objective(This project will solve business problems)

- How are sales, revenue and profit trending over time?
- Which product, regions, and sales representative drive performance?
- Where are leakage (Low profit, declining sales)?
- How can management optimize strategies?

Total sales, profit, and profit margin

- select
round(sum(sales_amount),2) as total_sales,
round(sum(sales_amount-cost_amount),2) as total_profit,
round(sum(sales_amount-cost_amount)*100/sum(sales_amount),2) as profit_margin
from ecommerce_sales_dataset;

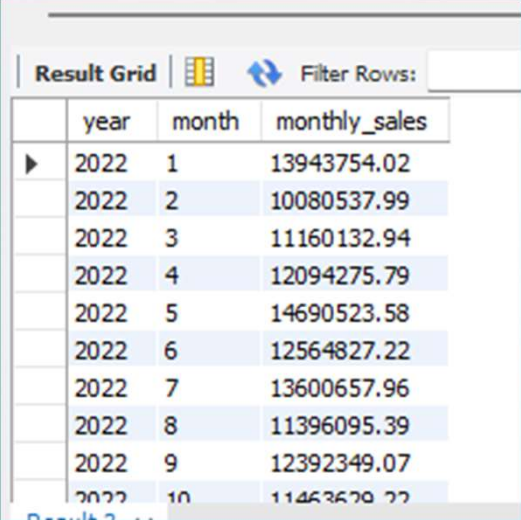

The screenshot shows a 'Result Grid' interface with a table containing one row of data. The table has three columns: 'total_sales', 'total_profit', and 'profit_margin'. The values are 470485095.46, 109335604.46, and 23.24 respectively. Above the table, there is a 'Filter Rows:' input field and an 'Export' button.

	total_sales	total_profit	profit_margin
▶	470485095.46	109335604.46	23.24

Monthly sales trend

- select
Year(order_date) as year,
month(order_date) as month,
round(sum(sales_amount),2) as monthly_sales
from ecommerce_sales_dataset
group by Year(order_date), month(order_date)
order by year, month;

	year	month	monthly_sales
▶	2022	1	13943754.02
	2022	2	10080537.99
	2022	3	11160132.94
	2022	4	12094275.79
	2022	5	14690523.58
	2022	6	12564827.22
	2022	7	13600657.96
	2022	8	11396095.39
	2022	9	12392349.07
	2022	10	11463679.77

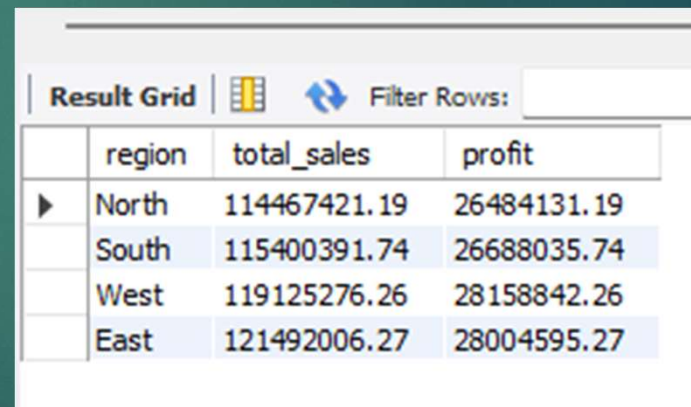

Sales by region

- select region,round(sum(sales_amount),2) as total_sales,
round(sum(sales_amount-cost_amount),2) as profit

from ecommerce_sales_dataset

group by region

order by sum(sales_amount);

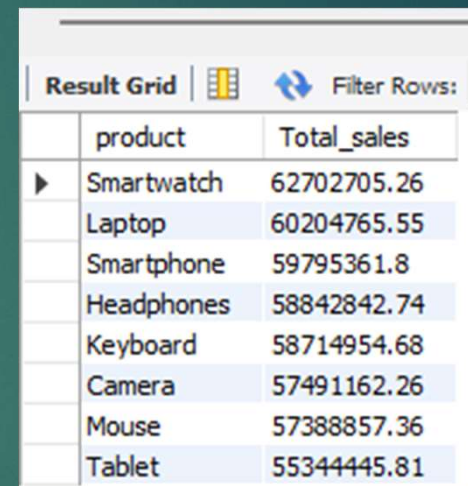

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with four columns: 'region', 'total_sales', and 'profit'. There are four rows of data representing different regions: North, South, West, and East. The 'total_sales' and 'profit' values are formatted with two decimal places. A 'Filter Rows:' input field is visible at the top right of the grid.

	region	total_sales	profit
▶	North	114467421.19	26484131.19
	South	115400391.74	26688035.74
	West	119125276.26	28158842.26
	East	121492006.27	28004595.27

Top 10 product by sales

- select product,
round(sum(sales_amount),2) as Total_sales
from ecommerce_sales_dataset
group by product
order by sum(sales_amount) desc
limit 10;

The screenshot shows a database interface with a 'Result Grid' tab. It displays a table with two columns: 'product' and 'Total_sales'. The table lists the top 10 products by sales, ordered from highest to lowest. The products are Smartwatch, Laptop, Smartphone, Headphones, Keyboard, Camera, Mouse, and Tablet. The 'Total_sales' values are rounded to two decimal places.

product	Total_sales
Smartwatch	62702705.26
Laptop	60204765.55
Smartphone	59795361.8
Headphones	58842842.74
Keyboard	58714954.68
Camera	57491162.26
Mouse	57388857.36
Tablet	55344445.81

Best Sales representatives

- ```
select sales_representative,
 count(distinct order_id) as total_orders,
 round(sum(sales_amount),2) as total_sales,
 round(sum(sales_amount-cost_amount),2) as total_profit
from ecommerce_sales_dataset
group by sales_representative
order by sum(sales_amount) desc
limit 5;
```

# Power BI dashboard design

- DAX for KPI cards
- Total Sales = SUM(orders[sales\_amount])
- Total Profit = SUM(orders[sales\_amount]) - SUM(orders[cost])
- Profit Margin % = DIVIDE([Total Profit], [Total Sales], 0)
- AOV = DIVIDE([Total Sales], DISTINCTCOUNT(orders[order\_id]))
- MoM Growth % =  
DIVIDE( [Total Sales] - CALCULATE([Total Sales],  
PREVIOUSMONTH(orders[order\_date])),  
CALCULATE([Total Sales], PREVIOUSMONTH(orders[order\_date])))

# Dashboard overview

- KPI cards – Sales, Profit, Profit Margin
- Slicers – Product, Region, and Representative
- Line chart – monthly sales trend
- Bar chart – Sales by region
- Pie chart - Category wise sales
- Donut chart - Sales by Representative
- Column chart – Sales by product type
- Bar chart – Total profit by years

# Business Insights

- key KPIs
- total sales: ₹470.5m
- total profit: ₹109.3m
- overall profit margin: 23.24%
- total orders: 6,000
- The business shows a healthy profit margin (~23%), indicating good pricing control and cost efficiency across categories.

# Sales Trend & Seasonality

- Sales show **consistent performance across years (2022–2024)**
- Slight peaks observed in **mid-year and festive months**
- No extreme volatility → stable demand pattern
- This suggests predictable revenue cycles, making it easier to plan inventory, staffing, and promotions

# Regional Performance

| Region | Total Sales | Total Profit |
|--------|-------------|--------------|
| East   | ₹121.5M     | ₹28.0M       |
| West   | ₹119.1M     | ₹28.2M       |
| South  | ₹115.4M     | ₹26.7M       |
| North  | ₹114.5M     | ₹26.4M       |

- 
- **East and West** are top-performing regions
  - Sales and profit are **fairly evenly distributed**
  - No region is severely underperforming
  - Actionable Takeaway - Double down on marketing and premium products in East & West while experimenting with localized offers in North & South.

# Top Products by Revenue

| Product    | Sales  | Profit | Margin % |
|------------|--------|--------|----------|
| Smartwatch | ₹62.7M | ₹14.8M | 23.6%    |
| Laptop     | ₹60.2M | ₹13.8M | 23.0%    |
| Smartphone | ₹59.8M | ₹13.6M | 22.8%    |
| Headphones | ₹58.8M | ₹13.8M | 23.5%    |
| Keyboard   | ₹58.7M | ₹13.4M | 22.8%    |

- 
- Insights - **Wearables (Smartwatch)** lead in revenue
  - Electronics dominate top 5
  - All major products operate in a **tight margin band (22.7–23.6%)**
  - Revenue is diversified — no single product dependency. This reduces risk and allows stable long-term growth.

# Low-Margin Products (Profit Leakage Risk)

| Product         | Margin % |
|-----------------|----------|
| <b>Keyboard</b> | 22.75%   |
| Smartphone      | 22.84%   |
| Laptop          | 23.00%   |
| Camera          | 23.15%   |
| Mouse           | 23.16%   |

- 
- Insight - These products sell well but generate **slightly lower margins**. Even a 1–2% margin improvement here could significantly boost profits.
  - Actionable Takeaway - Optimize supplier contracts, adjust pricing, or bundle accessories to lift margins for these high-volume SKUs.

# Sales Representative Performance

| Sales Rep    | Sales  | Profit |
|--------------|--------|--------|
| <b>Sneha</b> | ₹63.1M | ₹14.5M |
| Vikram       | ₹62.7M | ₹14.3M |
| Anjali       | ₹59.9M | ₹13.9M |
| Amit         | ₹59.4M | ₹14.0M |
| Neha         | ₹56.9M | ₹13.4M |

- 
- Insights - **Sneha & Vikram** are consistent top performers
  - Performance gap between top & bottom reps is moderate
  - Indicates a **well-balanced sales team**
  - Actionable Takeaway - Replicate best practices from top reps and roll them into training programs for mid-tier performers.

# Profitability Pattern

- all categories maintain a stable profit margin band
- no extreme loss-making product
- profit tracks closely with revenue → clean cost structure
- business insight - the business is well-controlled financially, but growth will come more from volume scaling and upselling than drastic cost-cutting.
